INTRODUCING R1

R1 DOT MY Sdn Bhd is an established training and consultancy business that's been operational since 2012; servicing financial institutions throughout the region in building both applications and teams. The Neuroware, Bloqverse and BCE brands are all managed by R1 - <http://r1.my>

R1 is also the first and only MSC status blockchain company, which was approved by MDEC and MOF in 2016 - when we also helped to launch the **Blockchain Embassy of Asia**.

Prior to blockchains, R1 was consulting the government and financial institutions regarding NoSQL database technology, and back in 2012 were the first certified MongoDB solution providers in Asia.

OUR BOOTCAMPS PROVIDE A DEEP DIVE INTO NEW TECHNOLOGIES

Our immersive approach to learning new technologies utilizes a combination of lecture based training and hands-on technical workshops, where we will personally guide participants as the group actively deploys working prototypes that are specifically based upon their core industry requirements

IOT Bootcamp

OUR CREDENTIALS

Each of our lecturers have spent decades both participating at and organizing various technical communities and events throughout Asia and Europe. We have been bringing this experience to corporate clients and regulatory agencies since first working with DBS in Singapore at the end of 2015 where we was paid to help organize the world's first bank backed blockchain hackathon
