R1 DOT MY SDN BHD (976862-M)

INTRODUCING R1

R1 DOT MY Sdn Bhd is an established training and consultancy business that's been operational since 2012; when we became the first certified MongoDB solution providers in Asia. This led to us consulting government agencies and financial institutions regarding NoSQL database technology.

We have since been servicing financial institutions throughout the region in building both applications and teams. The Neuroware, Bloqverse and BCE brands are all managed by R1

R1 is also the first and only MSC status blockchain company, which was approved by MDEC and MOF in 2016 - when we also helped to launch the **Blockchain Embassy of Asia**.

OUR SERVICES SUPPORT THE DEVELOPMENT OF OUR CORE PRODUCT

TRAINING

**From Blockchain Bootcamps
to FinTech Workshops and
Private Personal Coaching**

Our training specialties include advanced technology trends such as BIG data, Artificial Intelligence and IoT - taught by people using these technologies for real-world active use-cases

CONSULTING

**From Project Management
to Full Stack Development,
Design and Implementation**

Having actively worked with regulated financial institutions and the various regulatory agencies that govern them provides us with a unique perspective with fintech clients

EVENTS

**From Coding Hackathons
to Tech Conferences and
Community Meetups**

Since working with DBS in Singapore in 2015 to help launch the world's first bank-baked blockchain hackathon, we have been busy managing and launching various initiatives

(BLOCKCHAIN INFRASTRUCTURE)

OUR BOOTCAMPS PROVIDE A DEEP DIVE INTO NEW INDUSTRIES

Our immersive approach to learning new technologies utilizes a combination of lecture based training and hands-on technical workshops, where we will personally guide participants as the group actively deploys working prototypes that are specifically based upon their core industry requirements.

Distributed Systems

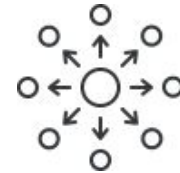

Consensus Mechanisms
Data Vs File Storage
Hash Tables & NoSQL

Blockchain Bootcamp

Introducing Crypto-Currencies
Understanding Blockchain Technology
Token Standards & Smart Contracts

Financial Technology

Licensed Operators
Regulation & Compliance
Global Innovation

TECHNICAL WORKSHOPS CONDUCTED BY LEADING DEVELOPERS

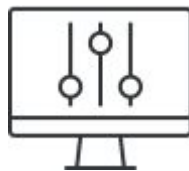

It is often said that the best way to learn is by doing, which is why we provide developer workshops conducted by community leaders that focus on problems specific to each organization's needs. We combine presented material with group sharing and pair-programming with the participants.

Data Management

From SQL to NoSQL
Distributed Data Lakes
Mastering BIG Data Schema

dApp Development

From Bitcoin to Ethereum
Storing Data Vs Storing Logic
Front-End HTML5 Integration

Smart Contracts

From ERC20 to ERC721
Automated Token Issuing
Creating Interactive Games
