

technical training with learning management and industry simulations

<http://r1.my>

R1 DOT MY SDN BHD (976862-M)

OFFICIALLY INTRODUCING OUR COMPANY

R1 DOT MY Sdn Bhd is an established training and consultancy business that's been operational since 2012; when we became the first certified MongoDB solution providers in Asia. This led to us consulting government agencies and financial institutions regarding NoSQL database technology.

We have since been servicing financial institutions throughout the region in building both applications and teams. The Neuroware, Bloqverse and BCE brands are all managed by R1

R1 is also the first MSC status blockchain company, which was approved by MDEC and certified by MOF in 2016 - when we also helped to launch the **Blockchain Embassy of Asia**.

OUR SERVICES SUPPORT THE DEVELOPMENT OF OUR CORE PRODUCT

CONSULTING

**From Project Management
to Full Stack Development,
Design and Implementation**

Having actively worked with financial institutions and various regulatory agencies that govern them - it provides us with a unique perspective where others can learn from our experiences

TRAINING

**From Blockchain Bootcamps
to FinTech Workshops and
Private Personal Coaching**

Our training specialties include advanced technology trends such as BIG data, Artificial Intelligence and IoT - taught by people using these technologies for real-world active use-cases

SUPPORT

**From Team Development
Tracking to Social Study
Groups & Industry Simulations**

Empower team development and internal collaboration by tracking business goals via structured multi-generational training, which includes industry simulations and tamper proof certifications

A blue-tinted background image showing a group of people in a workshop or training environment. Some individuals are standing and looking at a screen, while others are seated at tables. The scene is slightly blurred, emphasizing the text overlay.

TRAINING

Innovation Bootcamps & Technical Workshops

<http://r1.my/training/>

OUR BOOTCAMPS PROVIDE A DEEP DIVE INTO NEW INDUSTRIES

Our immersive approach to learning new technologies utilizes a combination of lecture based training and hands-on technical workshops, where we will personally guide participants as the group actively deploys working prototypes that are specifically based upon their core industry requirements.

Artificial Intelligence

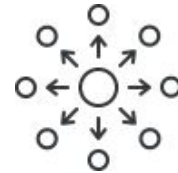

Dispelling the Myths
Mathematic Machines
Neural Networks

Distributed Ledgers

Introducing Crypto-Currencies
Understanding Blockchain Technology
Token Standards & Smart Contracts

Financial Technology

Licensed Operators

Global Innovation

TECHNICAL WORKSHOPS CONDUCTED BY LEADING DEVELOPERS

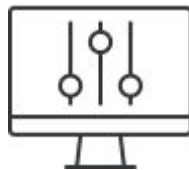

It is often said that the best way to learn is by doing, which is why we provide developer workshops conducted by community leaders that focus on problems specific to each organization's needs. We combine presented material with group sharing and pair-programming with the participants.

Machine Learning

Using Statistics for Support
The Guessing Game
Learning from Mistakes

ARTIFICIAL INTELLIGENCE

Public Group 5 minutes ago

Technology is a rapidly evolving field that is providing innovation teams from institutions around the world with new and exciting tools that bring with them complex terminology that can be challenging to those that are not using these technologies on a daily basis. From artificial intelligence being used for autonomous support channels and distributed ledgers providing the promise of removing all intermediaries, the impact for management teams to be kept within the fold.

1 question 01 day

Where did Bitcoin come from?

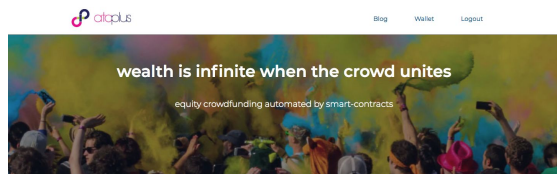

The use of crypto assets and distributed ledger technology in business and financial institutions promises secure, streamlined and faster processing of information. From specific functions such as supply chain and trade financing to more generic uses such as document management; the potential uses for businesses and financial institutions are almost unlimited.

RISK WARNING

Equity Crowdfunding is risky. You are investing in early stage companies which may not do well and could even fail. You could lose part or all of your investment. You may not be able to sell your shares easily.

Investments are speculative and carry high risks. To decrease economic, these risks of investments should only be made as part of a diversified portfolio. Spread your risk and only invest money that you can afford to lose. Consider each of the investments to understand these risks and make careful investment decisions. You are also encouraged to seek independent advice.
